

DFG-funded Collaborative Research Centre SFB 877 “Proteolysis as a regulatory event in pathophysiology”

Spokesperson: Prof. Dr. Stefan Rose-John, Institute of Biochemistry, Universität zu Kiel

Third funding period: 07/2018 – 06/2022

Projects and principal investigators

[The role of microtubule detyrosination in dendritic structure and function](#)

Dr. Marina Mikhaylova, ZMNH Research Group Neuronal Protein Transport, UKE

Dr. Michaela Schweizer, ZMNH Core Facility Morphology and Electron Microscopy, UKE
